USB/MIDI Multi-Touch Foot Controller

Softstep is a leap forward in foot controller portability and functionality.

Weighing in at just over a pound and fitting into many laptop and guitar cases, SoftStep has unparalleled flexibility compared to existing foot controllers.

Whether used with an effects rack or with popular software programs, SoftStep is the most affordable, versatile and expressive controller available.

Studio

Control punch-in/out, levels, jog wheel, panning and transport functions in Digital Audio Workstations/MIDI Sequencers.

Control multiple DSP plug-in parameters in real-time.

Map each of ten multi-touch keys to six unique notes, CC's, program changes or OSC in your studio apps.

Silent switching - click-free control of program change, patches, FX while recording.

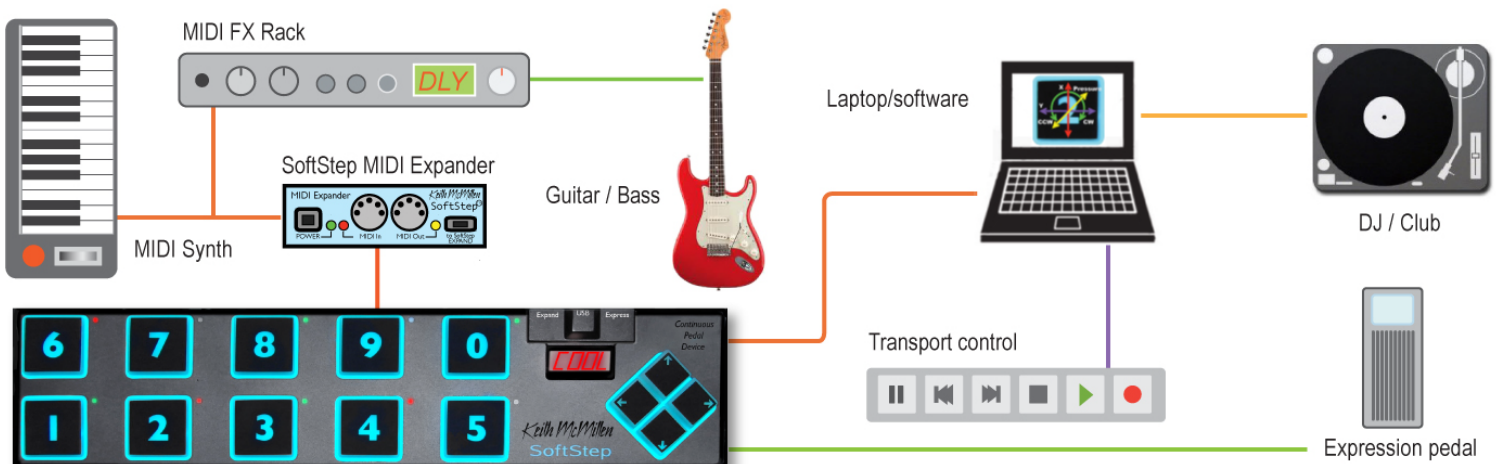

Stage

Virtual Pedalboard - connect to your MIDI hardware to switch programs, control parameters, trigger samples and loops.

Guitar/Bass players - control your MIDI FX hardware or software apps such as Guitar Rig and AmpliTube.

Laptop musicians/DJs - trigger and process loops/FX in Live, Reason and Traktor.

Keyboardists - keep both hands on your keys while switching patches, sweeping filters and tapping tempos.

Hardware

Connects to a computer or works standalone.

Ten multi-touch keys control up to 6 unique notes, Continuous Controllers, Program Changes, MMC, Aftertouch or OSC.

Each key is responsive to 5 degrees of control: X- and Y- axis, clockwise rotation, counter-clockwise rotation, and pressure.

Super-rugged design using elastomeric and graphite composites gives SoftStep maximum strength.

Weighs in at just over a pound, making it ultra-portable and airline carry-on friendly. Dimensions are 17.5" long, x 4.25" wide, x 1" high.

Four character alpha-numeric display and ten red-green LEDs give performance feedback. Blue back-lighting makes each key stand out and easily identifiable.

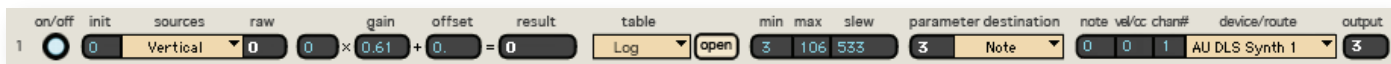

SoftStep comes equipped with USB connector and expression pedal jack and includes 5 meter USB cable, expression pedal adapter and protective sleeve.

Software

Control effects, looping and sample triggering in hardware and software apps such as Live, AmpliTube, Logic and Guitar Rig.

Scenes & Setlist- set up presets for each key and save them all within a given Scene. Group Scenes in the Setlist for easy studio and stage access.

For each of the 10 SoftStep keys there is a sensor view window (shown on right) that gives you real time visual representation of the key data coming from SoftStep.

MIDI Expander

SoftStep MIDI Expander is a must have add-on that enables you to control your MIDI world. Program with our easy to use control mapping software, plug in your MID rig, and you're ready to use Softstep with or without a computer.

SoftStep MIDI Expander comes with USB cables and a wall power supply.

Batt-O-Meter

Shows voltage, percentage and hours of life remaining without removing the battery.

Check hard-to-reach batteries via the 1/4" input on most instruments and effects pedals.
