

SoftStep KeyWorx

USB Foot Controller

SoftStep KeyWorx is great for easing the strain of repetitive computer tasks and assisting people with physical disabilities.

SoftStep KeyWorx allows users to setup commands for each of its 11 Multi-Touch key surfaces. You can select programs, bring a browser window forward, scroll through folders, open documents, control the cursor, send out keystrokes and mouse clicks, zoom in and out, control volume, output complex key commands, and more; all from simple foot movements.

"SoftStep KeyWorx is a revolutionary new access tool for people with disabilities. Its amazing breadth of customizability makes it useful for people with a wide range of computing needs, from simple Internet access to complex engineering design".

Jane Berliss-Vincent, Center for Accessible Technology, Ed Roberts Campus

- Keystrokes: send any key plus modifiers to any application
- Mouse Control: move the cursor, click or double-click left or right
- Open and Focus: launch programs, folders and files, and bring windows forward
- Navigation Pad: use as arrow keys or for pixel-precise control of the cursor
- Text Entry: use keypads for alpha-numeric entry
- USB Powered: connects directly to Mac or PC

SoftStep KeyWorx is available from leading online retailers including Amazon.com (www.amazon.com), Enablemart (www.enablemart.com) and Disabled Online (www.disabledonline.com).
