

This readme document is for use with the Manual QuNeo Software Installer. The manual installer will not automatically install software template files to locations outside of the QuNeo directory. This requires users to place these files into the correct directories themselves.

Ableton Live Template and LaunchPad Emulator Installation File Locations:

Go to your QuNeo installation directory and within that, go to "Software Templates/Ableton Live 1.0/Installation Files". Inside the installation files folder there will be a Live8 folder and a Live9 folder. Choose the version of Ableton that you use (the Live 8 scripts are also compatible with Live 7). Inside the version folder there will be 2 folders-- "QuNeo" and "QuNeoLaunchPad".

Mac:

Follow these steps to manually place the folders:

1. Locate your Ableton Live application (must be original not alias or shortcut):
 - a. If your Ableton Live version is **pre 8.3**: "Applications/Live [version]/Live.app"
 - b. If your Ableton Live version is **8.3 and up**: "Applications/Ableton Live [version].app"
2. Ctrl-click on the .app file and go to "Show Package Contents"
3. Now go into the "/Contents/App-Resources/MIDI Remote Scripts/" folder
4. Paste the "QuNeo" and "QuNeo LaunchPad" folders from "QuNeo__version#__mac/Software Templates/Ableton Live 1.0/ Installation Files" into the "MIDI Remote Scripts" folder.

Windows:

Follow these steps to manually place the folders:

1. Locate Ableton Live's "MIDI Remote Scripts" folder:
 - a. On **Windows XP**:
 - i. If your Ableton Live version is **pre 8.3**: "C:/Program Files/Ableton/Live [version]/Resources/MIDI Remote Scripts"
 - ii. If your Ableton Live version is **8.3 and up**: "C:/Documents and Settings/All Users/Application Data/Ableton/Live [version]/Resources/MIDI Remote Scripts"
 - b. On **Windows 7**:
 - i. If your Ableton Live version is **pre 8.3**: "C:/Program Files (x86)/Ableton/Live [version]/Resources/MIDI Remote Scripts"
 - ii. If your Ableton Live version is **8.3 and up**: "C:/ProgramData/Ableton/Live [version]/Resources/MIDI Remote Scripts"
2. Paste the "QuNeo" and "QuNeoLaunchPad" folder from "QuNeo__version#__win/Software Templates/Ableton Live 1.0/Installation Files" into the "MIDI Remote Scripts" folder.

Note to Windows 7 users: The "ProgramData" folder is hidden. If you need to find it go to "Control Panel", then to "Appearance and Personalization". Find "Folder Options" and click on where it says "Show hidden files and folders". A window will pop up. Under the "Hidden files

and folders" label, click "Show hidden files, folders, and drives". Now press apply and you should be able to find the "Program Data" folder. After copying the installation files into their proper locations you go back to Folder Options and click "Don't show hidden files, folders, or drives".
