

## Serato Template Quickstart Guide

QuNeo Version 1.0  
July, 2012

### INTRODUCTION

Our Serato Scratch Live template consists of an XML Preset file. The Remote Control Surface map goes with QuNeo's factory preset number 1-3. This turns QuNeo into a remote control for Serato.

To use the QuNeo Serato Preset you must have a version of Scratch Live (Serato). Go to <http://serato.com/scratchlive> to purchase or learn more about Serato.

Our Serato Template map comes in the QuNeo Software Installer. When running the QuNeo installer, if on Mac, make sure "Serato" is checked when prompted with the window on the right during the installation.

The mapping preset file "QuNeo Serato 1.0.xml" will be installed to a specific location on your computer. If the installer cannot find this location, it will appear in the QuNeo directory's "Software Templates/Serato 1.0/Warning - Installation Error" folder. See the Troubleshooting section below for instructions on where to put the files.

## To use the Template:

1. Connect the QuNeo to your computer and launch: Scratch Live(Serato)
2. On your QuNeo select factory Preset 1.

3. In Scratch Live(Serato) locate the "SETUP" button in the upper right hand corner of the Scratch Live Interface. Click the SETUP button to enter the SETUP Menu.

4. At the bottom of the SETUP Menu are selection of Menu Tabs. Select the "MIDI" tab (shown below).
5. Select "QUNEO" under "MIDI Devices".
6. Select "QuNeo Serato 1.0" under "MIDI Presets" and click the "Load" button.

7. Click the SETUP button to exit the SETUP Menu  
*Note: These mappings are specific to Deck 1+2 with SL4. These mappings Do Not work properly with Deck 2+3 or Deck 3+4 with SL4.*

### MIDI Output diagram for QuNeo preset 1:

This image shows what MIDI data will output for each sensor in the "Drum C1-D#2 / Serato" preset. The second and third QuNeo preset also work with Serato. Presets 2 and 3 have the same MIDI data output as the first preset except the pad notes increment up as the preset # increases. So the pad notes on preset 1 are shown below from C1-D#2, preset 2 are from E2-G3, and preset 3 are from G#3-B4.

These presets are in Drum Mode and don't use banks. Rotaries are set to use Direction instead of Location. Pass Thru Widths for the rotaries are set to 127. The Pad X/Y Return values are set to 63. Velocity response is enabled for all notes on the Pads; velocity is fixed at 127 for notes on other sensors.

## TROUBLESHOOTING:

### If you can't find the "QuNeo" preset in Serato's Setup Menu...

#### Mac:

Open the folder "/Applications/QuNeo\_mac\_[version#]/Software Templates/Serato 1.0/". If you see a folder called "Warning - Installation Error" then the installer could not locate the proper installation directory. Follow these steps to manually place the installation files:

1. Find the "QuNeo Serato 1.0.xml" file inside the "Warning - Installation Error" folder.
2. Copy this file and paste it into this directory: "\_\_user\_\_/Music/Serato/MIDI/". If you do not see a "MIDI" folder you can create one and then paste the file into it.

#### Windows:

Go to your QuNeo installation directory (defaults to "C:/QuNeo\_win\_[version#]") and within that, go to "Software Templates/Serato 1.0/". If there is a folder called "Warning - Installation Error" then the installer could not locate the proper directory to place the installation file. Follow these steps to manually place it to the correct location:

1. Find the "QuNeo Serato 1.0.xml" file inside the "Warning - Installation Error" folder.
2. Copy this file and paste it into this directory:
  - a. **Windows XP:** "C:/Documents and Settings/[user]/My Documents/My Music/Serato/MIDI/". If you do not see a "MIDI" folder you can create one and then paste the file into it.
  - b. **Windows 7:** "C:/Users/[user]/Music/Serato/MIDI/". If you do not see a "MIDI" folder you can create one and then paste the file into it.
