This readme document is for use with the Manual QuNeo Software Installer. The manual installer will not automatically install software template files to locations outside of the QuNeo directory. This requires users to place these files into the correct directories themselves.

Mixx Template Installation File Locations:

Mac:
Go to your QuNeo installation directory and within that, go to "Software Templates/Mixxx 1.0/Installation Files". Follow these steps to manually place the installation files:

1. Find the "KMI QuNeo.midi.xml" and "Kmi-QuNeo-scripts.js" files inside the "Installation Files" folder.
2. Locate the icon to launch the Mixxx application. This must be the original file, not an alias.
3. Right-click (or control-click) on the icon and go to "Show Package Contents".
4. Go into the "Contents/Resources/midi" folder
5. Copy the "KMI QuNeo.midi.xml" and "Kmi-QuNeo-scripts.js" files from the "Installation Files" folder and paste them into the "midi" folder.
6. Now you can open up Mixxx and select the MIDI mapping preset. Use the Mixxx Quickstart for more instructions on using the QuNeo Mixxx Template.

Windows:
Go to your QuNeo installation directory and within that, go to "Software Templates/Mixxx 1.0/Installation Files". Follow these steps to manually place the installation files to the correct locations:

1. Find the "KMI QuNeo.midi.xml" and "Kmi-QuNeo-scripts.js" files inside the "Installation Files" folder.
2. Copy "KMI QuNeo.midi.xml" and "Kmi-QuNeo-scripts.js", then paste them into this directory: "C:/Program Files/Mixxx/midi/".
3. Now you can open up Mixxx and select the MIDI mapping preset. Use the Mixxx Quickstart for more instructions on using the QuNeo Mixxx Template.
